

The revolutionary concept of the EASY!Force high-pressure gun ensures fatigueless working over long periods. The recoil force of the high-pressure jet is used to reduce the holding force for the operator to zero. In terms of durability, the high-pressure gun impresses with high-quality materials: the ball and sealing seat of the ceramic valve are far harder than any conceivable foreign particle. The full ceramic valve ensures a 5 times longer lifetime in comparison to other high-pressure guns.

## Specifications

- Temperature (°C) max. 155
- Max. pressure (bar) 300
- Connection thread EASY!Lock
- Weight incl. packaging (kg) 0,8
